Portfolio: https://rcxtor.vercel.app/ | **Address:** Ibrahimpur, Kafrul, Dhaka-1206

OBJECTIVE

Junior full-stack developer with hands-on experience building REST-based web applications with **PHP (Laravel)** and **MySQL**, and **React** front ends. Passionate about building practical web applications and interactive experiences. Seeking a full-time full-stack software development role where I can contribute and learn from the bests.

WORK EXPERIENCE

February 2026 – May 2026

Unity Developer Intern – XR Interactive

- Developed hyper-casual games in Unity using C#: a tile-matching memory game for a Horlicks event and a moon-finding game featuring a magnifying glass mechanic.
- Collaborated with teammates using Git to fix bugs, refine gameplay, and polish game features.

PROJECT EXPERIENCE

- **URL Shortener** - A full-stack URL shortening platform with authentication, analytics, and guest links, built with Laravel, React, REST API, and MySQL. — Github, Live Link
- **Pet Heaven** - full-stack pet adoption web application that connects pet owners with potential adopters. Built using React.js, Laravel (PHP), and MySQL, with REST API integration between the frontend and backend. — Github, Live Link
- **GS Store** - An online platform made using PHP (laravel) for purchasing softcopy of games and with plan to expand more. — Github
- **Stroke Prediction** - Using machine learning, KNN, SVM, Regression Tree and Random Forest approach using a healthcare dataset to predict the chance of a stroke event. — Github

CERTIFICATIONS

- **React Basics by Meta** – React · Coursera · 2026 — Certification

TECHNICAL SKILLS

Backend	PHP (Laravel), MySQL, REST API design, MVC architecture, Eloquent ORM
Frontend	React, JavaScript (ES6), HTML5, CSS3, Tailwind CSS, Vite, React Router
Tools & Workflow	Git, GitHub, Postman, Docker, AI-assisted development (code generation, review, debugging, documentation)
Soft Skills	Critical Thinking, Teamwork, Time Management
Others	Python (scikit-learn, Pandas), Unity (C#), PlayCanvas

EDUCATION

2021-2025 — **BRAC University, Dhaka**
Computer Science and Engineering
CGPA: 3.30/4.00
Thesis: "Bangla Sentiment Analysis based on product review"

2020 — **Manarat Dhaka International School and College, Dhaka**
A-Levels (Science)
2A* and 1B

2018 — **Manarat Dhaka International School and College, Dhaka**
O-Levels (Science)
3A*, 1A and 1B

THESIS

Bangla Sentiment Analysis based on product review - A sentiment analysis model to classify Bangla text into positive, negative, or neutral categories using machine learning techniques.

- Used **Traditional Machine Learning** Models, **Deep Learning** Models with Word Embeddings and **Transformer-based** Models.
- Used Python, Pandas, and scikit-learn
